

**MANAGEMENT DEVELOPMENT
PROGRAMME**

**Access to Essential
Medicines in low &
Middle-income countries**

March 19-March 23, 2018

iUHM UNIVERSITY

School Pharmaceutical Management

Background

In developing countries most of leading cause of disability and death can be prevented, treated, or alleviated with availability of cost-effective essential medicine at public and private health facilities. Despite of this facts, hundred and millions of people do not have regular access to essential medicines. Many of the population those who have access are receiving incomplete dose regime or given wrong treatment for their illness, or do not use the medicine correctly.

To addresses the technical and professional ways in which government, essential medicine program managers, policy makers, NGOs, donors and other can work to ensure that high quality essential medicines are available, affordable, and used rationally at their health facilities, the international training programme on “**Access to Essential Medicines in Low & Middle-Income Countries**” will be conducted during **March 19 - March 23, 2018** at The IIMR University, Jaipur, India.

Objectives

The specific objectives of the program are:

- To understand the concepts of access to essential medicine with their objectives, effective management and good governance to improve performance.
- To learn about various challenges in pharmaceutical management regarding effective public pharmaceutical supply, financial sustainability and regulating quality safety and efficacy of medicines.

Contents

WHO defined access to medicines as having medicines continuously available at affordable prices at public or private health facilities or medicines outlets that are within one hour’s walk from the homes of the population.

- Policy and legal framework for sustainable access to essential medicines
- Pharmaceutical pricing policy
- Pharmaceutical financing strategies
- Global and Donor financing
- Pharmaceutical supply chain
- Managing Pharmaceutical Procurement
- Quality assurance for pharmaceuticals
- Rational medicine uses
- Pharmacovigilance
- Pharmaceutical regulatory sciences for safeguarding public health.
