

Management Development Program On

# Clinical Data Management

January 15-17, 2018

## Background

Clinical Data management (CDM) is a management of the data in accurate and legible way during the entire clinical trial conductance with compliance of ICH-GCP, local regulatory and protocol specifications. Clinical data management is growing continuously and different business players entering in this lucrative segment of clinical research. Many pharmaceutical companies are outsourcing their data management activities to leverage their cost and time. The demand in this sector is growing-up steadily over the years, not only in pharmaceutical but in healthcare domain also. Technology is changing at its own pace and traditional data capturing tools are obsolete now a day with the new innovative electronic data capturing and remote monitoring techniques. All information and data gathered to be analyzed precisely and validated for their subsequent approvals from the regulatory authorities. Due to increased volume of pharmaceutical and healthcare industries; there is a high demand of large number of skilled and trained human resources in clinical data management. Trained human resources in clinical data management is always a need of hour in industry and IIHMR University providing a plaVorm to aspirants who may be trained in clinical data management perspectives.

This course will be helpful to fresh B. Pharm, M. Pharm students and working professionals like data Entry Associates, Data Coordinators, Data Managers, Data Safety Associates, Team Leaders, Data Safety Managers, Team Leaders, Project Managers to plan and monitor implementation of strategies more effectively to refine the clinical data for regulatory acceptance. The course will cover the current industrial needs of clinical data management to ensure compliance of clinical data as per regulatory requirement in a timely manner. CDM training program is an effective management program.

With this background, the IIHMR University, Jaipur has designed a Management Development Program to strengthen program management competencies of pharma professionals. The program will provide a rare and unique opportunity to interact with subject experts.

## Program Coverage

The course consists of the following contents:
