MBA Hospital and Health Management

PROGRAM OVERVIEW

The university's flagship educational program, MBA Hospital and Health Management aims to develop trained professional managers with requisite skills in planning, implementation, operational management, diagnosis and problem solving, consultancy, and entrepreneurship. Through this rigorous program, graduates are able to manage hospitals and healthcare institutions globally, both in the public and the private sectors, thus meeting the demand for quality healthcare management. The in-take capacity of the program is 180.

The University builds achievers through the program. Our students have brought laurels in many inter-campus and national competitions in academic and non-academic activities. They have presented papers in conferences organized by the University, various other institutions and have published their papers and won prestigious international scholarships. The University also encourages students to take up entrepreneurship. For this purpose, an Incubation Centre has been established at the university.

OBJECTIVES OF THE PROGRAM

The broad objective of the program is to build knowledge and skills to facilitate high performance as effective professionals in health and hospital systems, both in the public and private sectors. The syllabus and course content are designed keeping in mind the current requirements of the healthcare industry. The objectives are as under:

- To enhance decision making and administrative competence of the students to enable them to face challenges of the healthcare industry.
- To develop skills in planning, building and managing healthcare organisations.
- To participate and contribute to the formulation of public health policies.
- To promote knowledge through applied and conceptual research relevant to management and to disseminate this knowledge through publications.
- To collaborate with other institutions in India and abroad for furtherance of professional exposure.
- Management education and assisting in institution building in a meaningful manner.

PROGRAM OUTCOME

- The program helps the students to understand the latest concepts and techniques of management and their application in making the managerial roles of the participants efficient and effective.
- To develop skills of analyzing, diagnosing and solving operational problems in the delivery of healthcare and hospital services.
- To help learn about appropriate strategies for effective planning, implementation and evaluation of institutional and community based health and family welfare program.
- To help learn the application of qualitative and quantitative analytical tools as applicable to health and hospital management related problems.
- To help understand and appreciate methodologies of health/hospital management training and develop skills with focus on strategic responsibility for training and human resource development for health care delivery.

- To enlarge the outlook and vision of participants about the larger background and context of health care and health management in their historical, sociological and cultural framework.
- To help them to learn to promote the efficient and equitable allocation of resources and development of strategies to promote public health and cost-effective healthcare.
- To understand application of scientific approach to reduce cost of care through better material and money management.

FACULTY

The faculty at IIHMR University includes the crème de la crème of the healthcare industry. The faculty members are highly qualified and experienced, with unmatched expertise in their subjects. They continuously engage themselves in research, teaching and raising the bar in healthcare management education.
