5. Suggestions, if any to improve the Curriculum:

It would be more beneficial if we have frequent field visits and we get exposure to more industrial scenarios. While teaching in class, faculty can use as much as case studies so that we are able to think critically and are able to solve problems more professionally.

5. Suggestions, if any to improve the Curriculum:

I believe any course like Healthcare Analytics requires a more practical approach to learning, while theory is equally important. Secondly, the syllabus needs to be updated to include industry-relevant courses like Python, SAS, etc., and more time needs to be devoted to them.
