Skillsets required in this industry is more congruent towards the interpersonal communication, Health IT tools and networking. Hence, it is a strong recommendation to inculcate activity based learning modules rather than traditional theories of management. Honestly, this is going to make their life and approach toward the discipline better

Corona virus is here to stay, no field visits due to Covid-19 is not a relevant excuse anymore. Also please focus on corporate and placement training of the students. Making students grasp just theory will not help them in getting good placement. Note: try to focus more on building a strong placement team rather than changing the team every year.
