IIHMR University, Jaipur

Executive Summary

I am happy to present the report of IIHMR University, Jaipur, for December 2022. In December, we inaugurated Cohort 2 (2022-24) of Executive MPH and Executive MHA programs. These programs received very good response from the industry. We continued to promote knowledge-sharing initiatives through the Masterclass and Know Your Alumni series.

The participants of the International Training Programme on "Digital Governance in Health" organized by the National Institute of Labour Economics Research and Development (NILERD), NITI Aayog, Government of India visited IIHMR University for a 3-day study tour, to better understand IIHMR University's research and education programs. The participants were from five countries namely Iraq, Philippines, Tajikistan, Malawi, and Tanzania.

The university also organized various cultural/musical programs such as Sufi Musical Evening and Spectrum for students, faculty and staff. We also organised Annual Sports Meet - UMANG 2023. Additionally, in partnership with UNICEF, IIHMR University conducted an Awareness Campaign on Marriage and Birth Registration to promote awareness of these critical social issues.

IIHMR University's students participated in conferences and workshops at national and international platforms, reflecting the university's commitment to providing students with practical experience and exposure to global best practices.

Finally, the university achieved a good ranking in Business India, which reflects its reputation as a leading institution in the field of public health and management education.

Overall, IIHMR University had a highly productive and successful December 2022, with the continuous support and guidance of the Board of Management.

Abstract: Industry 4.0 (I4.0) has revolutionized every sector in the last decade. A huge demand has been created in the supply chain for doorstep delivery services. However, many barriers are hindering the progression of I4.0 implementation to last-mile delivery (LMD) operations. In this study, these hindrances need investigation for improving customer satisfaction levels in LMD. The present research is focused on analyzing barriers to adopting I4.0 technologies for sustainable smart supply chains with a special focus on LMD operations. The published literature is critically investigated to determine the crucial factors which are acting as barriers to I4.0 implementation in LMD. The interpretive structure modeling (ISM) approach is adopted to evaluate different levels with their hierarchical order for analyzing the I4.0 barriers to digitalized logistic networks. Delivery capacity emerged as the major barrier to LMD operational networks due to insufficient technological and hardware support for I4.0 cyber-physical systems in logistics. Infrastructure for I4.0 emerged as the most basic requirement for the smart logistics management criteria for efficient LMD. The need to adopt I4.0 technologies for developing inventory hubs and warehouse management has evolved recently. There is scope for customized and specific case studies for the supply chain to achieve a higher level of sustainability. A conceptual framework for a smart and sustainable supply chain is presented and future directions for sustainable LMD are discussed.

Keywords: Industry 4.0 (I4.0); logistics management; last-mile delivery (LMD); barriers; sustainability; interpretive structure modeling (ISM)

1. Introduction

The logistics sector is growing at a high rate in global economies, leading to the digitalization of all supply chain processes. Logistics management keeps control of the complete process, from the collection of raw materials for manufacturing units to the last-mile delivery of finished and packed products to the customers. Logistics companies have grown globally and created a major difference at the global competition level. All industrial firms are focusing on increasing their efficiency level at every stage, such as procurement, inventory management, production planning, supply of materials and products, etc. In 2021, the size of the international logistics market reached USD 4.92 trillion, and researchers and industry experts are projecting that the market will rise at a compound annual growth rate of 4.7 percent between 2022 and 2027, which will surpass USD 6.55 trillion [1]. In the present scenario, logistics firms interact with many manufacturers, suppliers, transporters, warehouses, retailers, and delivery services in the supply chain, making logistics management a complex system. This creates a need for optimized technical solutions to meet business and sustainability goals [2].

Many developing nations are becoming manufacturing hubs for global production and supply. In particular, India and China have emerged as global leaders among the

MULTI-CLASS SUPPORT VECTOR MACHINE MODEL FOR EHR ACCEPTANCE AMONG UAE DOCTORS

Abstract:

In this work, modified Unified Theory of Acceptance and Use of Technology (UTAUT) model is developed for acceptance of Electronic Health Record (EHR) by doctors in United Arab Emirates (UAE). In this model, the factors affecting the level of acceptance by doctors towards usage of EHR are identified and analysed with modified basic constructs of UTAUT model. The collected pilot data is grouped according to the doctor's age, gender, experience qualification and assigned priorities. The weighted probabilities (WP) of the modified constructs are determined by applying Multi-class Support Vector Machine (M-SVM) over each category of candidates. Based on the determined values of WP, the EHR acceptance ratio (EAR) is estimated using linear equation (LE) and linear regression (LR) models. From the statistical results, it is seen that the Expected Performance Construct has the highest impact on EAR in case of both LE and LR models.

Key words:

Electronic Health Record (EHR);
EHR acceptance ratio; Multi-class Support
Vector Machine (M-SVM); United Theory

of Acceptance; Use of Technology
(UTAUT)

1.Introduction

EHR is considered as the bristle subordinate association of numerous evidence tools that will enhance sign of the approval into Health Care specialists' choices. Electronic Medical Record

(EMR) is considered as an indispensable module for any Health care association. Healthcare sources like Doctors and Nurses spend extended ages of period in the course of their workday gathering as is

International Training Programme on Digital Governance in Health

International students from Iraq, Philippines, Tajikistan, Malawi, and Tanzania visited the IIHMR University, Jaipur for a 3-day study tour as part of an International Training Programme on "Digital Governance in Health" organized by the National Institute of Labour Economics Research and Development (NILERD), NITI Aayog, Government of India. The students had an insightful and engaging interaction with Dr. P.R. Sodani, President - IIHMR University.

MoU

A MoU is made between CK Birla Hospitals, Jaipur & IIHMR University

The MoU outlines the broad framework of understanding between IIHMR University, Jaipur and CK Birla Hospitals, Jaipur to formally establish continuing collaboration by identifying and developing areas of cooperation.

This strategic partnership with CK Birla Hospitals, Jaipur is done to provide better learning and career opportunities to IIHMR Students and doing joint research proposals/ papers and organizing workshops/ conferences/ seminars/training programmes.

MoU

IIHMR Startups signs MoUs with CK Birla Hospitals, Jaipur and Sucseed Indovation Fund for supporting early-stage healthcare startups in clinical research, access to CSR projects and raising funds.

IIHMR Startups (A Unit of IIHMR Foundation) signed MoU with CK Birla Hospitals, Jaipur and Sucseed Indovation Fund in December 2022.

Partnership with CK Birla Hospitals, Jaipur (The Calcutta Medical Research Institute) will support startups in clinical research and other healthcare industry related things including access to CSR support to startups.

The MoU with Sucseed Indovation Fund will help early- stage healthcare startups with investment and mentorship to scale their venture. Sucseed Indovation Fund is an angel fund registered with SEBI as Category-I AIF-VC Fund- Angel Fund. Sucseed Indovation is formed to support and nurture upcoming deep-tech startups.

Sufi Musical Evening

December 12, 2022

The IIHMR University was honored to host Mir Bassu Khan and Sabir Khan, two incredible musicians who represent the 27th generation of a unique style of sufi singing from the Thar region of Bikaner.

These talented singers are not only skilled in performing the classic sufi compositions of Bulleh Shah, Shah Hussain, Sultan Bahoo, Amir Khusro, and Ghulam Farid, but they are also well-versed in the nirguni bhajan traditions of Kabir and Gorakhnath.

The university was delighted to have these two extraordinary musicians to offer their students the chance to experience the beauty and richness of sufi music.

Awareness Campaign on Marriage and Birth Registration December 16, 2022

To increase awareness about the importance of marriage and birth registration in Rajasthan, students, faculty, and staff of IIHMR University organized an awareness campaign.

The rally flagged off by Dr. Om Prakash Bairwa, Chief Registrar and Director at the Department of Economics and Statistics in Rajasthan, and Dr. P.R. Sodani, President of IIHMR University. During the rally, Dr. Bairwa emphasized the significance of registering marriages and births in order to access government benefits and programs. The event was also attended by Mr. Ashok Kumar Jain, Joint Director at the Department of Economics and Statistics, Mr. Vikram Singh Raghav, State Technical Consultant at UNICEF and Dr. Dharendra Kumar, Professor and Project Director at CRVS.

NEW NORMAL EDUCATION LEADERSHIP SUMMIT & AWARDS 2022

Dr. P. R. Sodani, participated as a keynote speaker at the NEW NORMAL- EDUCATION LEADERSHIP SUMMIT & AWARDS 2022 organized by ArdorComm on 17th December 2022.

Dr. Sodani, shared valuable insights on How can R&D, Innovation, and Skilling Play a Central Role in Economic Growth & Job Creation".

The poster features a circular portrait of Dr. P. R. Sodani, a man with a mustache wearing a dark blue suit and a patterned tie. The background of the poster is a light grey with a faint, repeating pattern of a traditional Indian architectural structure. The text is arranged in a clean, modern layout with various colors (blue, red, black) used for emphasis.
