Executive Summary

Dr. P. R. Sodani

President
IIHMR University, Jaipur

In the month of July, we have successfully executed a range of initiatives that embody our strong commitment to research excellence, collaboration, and the sharing of knowledge. Our efforts included the organization of management development programs and conferences designed to nurture the growth and advancement of human resources for the healthcare sector.

Notably, we hosted significant conferences focusing on emerging topics, such as the "National Conference - Transforming Management Education in India: Challenges and Opportunities" and the "National Conference - Paradigm Shift in Management Education: The Way Forward." These events provided platforms for substantial discussions and knowledge exchange.

The highlight of this period was the 2023 convocation at IIHMR University, Jaipur, where a total of 308 students received their degrees. Among these graduates, 201 were from the MBA Hospital and Health Management program, 77 from the MBA Pharmaceutical Management program, 21 from the MBA Development Management program, and 9 were awarded PhD degrees.

Our engagement with industry experts continued through the Industry-Academia Interactions, which fostered enriching discussions and the sharing of insights. Furthermore, our students greatly benefited from participation in conferences and webinars, gaining valuable global exposure that enriched their knowledge and experiences.

Throughout the month, we prioritized knowledge-sharing initiatives. This included organizing Masterclasses, the informative Know Your Alumni series, and thought-provoking webinars. These activities aimed to bridge the gap between theoretical knowledge and practical application, fostering exchanges between academia and industry experts. Additionally, our esteemed faculty contributed significantly to the academic community by publishing numerous research papers and publications, thereby disseminating new insights and knowledge.

We extend our sincere gratitude to the unwavering support and guidance provided by the Board of Management. As we look ahead, we remain resolute in our mission to provide an exceptional and transformative educational journey for our students.

Abstract

Today employees are in pursuit of purpose and connections on emotional, social, physical and spiritual levels. It is all the more pertinent for the employer to understand employees and offer them significance and value. In the present context employees expect integration of work life with their individual as well as emotional needs. Their spirituality impacts the way they identify themselves, which has a profound impact on their pursuit of self-actualization. Juxtaposed to it is the Emotional Intelligence of the employee, the impact of which manifests into the overall performance of the employee and the organisation. Delivering positive Employee Experience is still an innovative and untapped solution that results in talent retention, agility, engagement. In order explore the interplay between
