

Management Development Programme on **Laboratory Management**

 March 24 - 26, 2025

Industry partner

 **BIOHUBB**TM
Biopreserve Innovations

Background

Laboratory Management designed for middle to senior professionals in government, private hospitals, and corporate labs, it enables participants to pursue higher education. The objective of the Laboratory Management is to equip individuals with the knowledge and skills necessary to effectively manage and lead laboratories. Recognizing the pivotal role laboratories play in healthcare, where 80% of patient care relies on diagnostic tests and analyses, the programme aims to cultivate competent leaders who can ensure the quality, efficiency, and regulatory compliance of laboratory operations, thereby optimizing patient care and decision-making.

Objective

Leadership and Quality Excellence: Develop leadership skills and ensure compliance with international quality standards to optimize laboratory performance and patient care.

Technology and Innovation: Harness advanced technologies, including LIS and AI, to modernize laboratory operations and improve diagnostic accuracy, performance and patient care.

Financial and Risk Management: Build financial acumen and risk management strategies to ensure sustainable and resilient laboratory operations.

Research and Clinical Competency: Enhance capabilities in research, clinical trials, and data management to drive innovation and evidence-based decision-making.

Business Growth and Marketing: Equip participants with marketing and business strategies to expand laboratory services and thrive in competitive markets.

Content

- 1 Principles of Management
- 2 Laboratory Information Systems
- 3 Human Resource Management
- 4 Lab Quality & Regulatory Compliance
- 5 Research Methods
