

# Management Development Programme on

# Monitoring and Evaluation: Result Matrix

December 2 - 6, 2024

## Background

Monitoring and Evaluation (M&E) is critical and integral to any programme implementation. It is one of the important key functions of the programme manager. It enables the programme manager to implement the programme as per the planning and strategy for achieving results efficiently and effectively. Regular and concurrent monitoring diagnoses system and delivery-related issues and provides feedback on the current situations to support decision-making for mid-course corrective actions. Moreover, the evaluation measures the change in outcome during the intervention period. Hence, monitoring and evaluation are very important tools for programme managers to keep track of the result matrix to ensure smooth implementation and achieving desired outcomes.

## Objective

By the end of this programme, the participants will learn to:

To discuss the concept and definition of monitoring and evaluation

To develop verifiable indicators, milestones and outcomes to measure programme objectives

To design and develop a monitoring matrix for achieving desired results

To study designs for conducting monitoring and evaluation (baseline, mid-line and end-line)

To prepare an operational plan for monitoring and evaluation
