**Safeguarding of Health Care Professionals
through Medico-Legal Systems and Applicable Case Laws**

📅 December 01 - 03, 2023

Background

Medical Professionals specially doctors are second to God and save life of people with their medical expertise. The legitimacy runs parallelly with the medical profession and how the medico-legal issues could be resolved within the time frame is a major concern in the profession. Medico-legal cases are piling up in Consumer Courts for compensation due to medical negligence, malpractices, and case related problems, corporate negligence is also an issue that needs to be addressed, tackled at management level to safeguard medical professional, and avoiding litigation matters. Our experts from the different field of Law (Consumer Affairs, IPC-1860 (Bartiya Nyay Sanhita, BNS), CrPC-1973 (Bhartiya Nagrik Suraksha Sanhita, BNSS), PCPNDT-1994, MTP-1971, Forensic etc.) & Hospital Administration make the Medical Practitioners, Healthcare Entrepreneurs, Pharmaceutical Professionals & Nursing Professionals aware of various rules and regulations, Law Compliances, Good Documentation Practices, and various acts, are delivering the knowledge of law to safeguard the healthcare professionals during their practices. This training will be useful for healthcare professionals involved with the patient care and providing their services in hospitals. Healthcare professionals are naive in legislations related to healthcare profession in the areas of Indian Laws, Clinical Risk Management, Hospital Management, and Patient Safety as a part of their profession. Patient-doctor relationship based on the outcomes of the treatments given to patient and subsequent recovery of patient but if the safety of the patient is compromised inadvertently with an unwanted and irreversible injury, then litigation matter evolves is required to be controlled, handles, and resolved as per laws.

This programme is designed to provide an adequate understanding of medico-legal documentation, informed consent process (what, when, how, why and for whom), medico-legal examination in cases of sexual assault, Medico-negligence, Doctor protections under law, Finger printing which may keep aloof to a medical practitioner from any lawsuit matters in future. The learning will be acquainted to deal with day-to-day medico-legal cases at individual level and hospital level as vicarious liability to sort out the medicolegal issues.

This acquired knowledge or skills will be further applied for the improvement of patient safety and care in a better way for the protection of doctors from any legal trials eloquently or innocently.

Objectives

The main objective of the programme is to focus on vital knowledge about the core medico-legal aspects of healthcare. It will enable health care professionals to imbibe the knowledge of law, proactive approach of litigation matters, law proceedings, protection, and precaution from adversity of medical profession under Indian Judiciary System. This training will provide a mix of teaching from experts and practitioners in the areas of law, governance, and medicine, by way of continuous interaction, case-study presentations, case proceedings, precautionary measures, compliance of healthcare rules & regulations under law decision analysis.

Pedagogy

The teaching approach is to utilize substantive, case-study, and an interactive style to learning with as practical as possible input from lecturers who are specifically required to draw from their professional expertise in the fields of litigation, insurance, consenting, claims handling and other areas of medical law and ethics. Learning is acquired through open discussion of professional topics, case study analysis and live interaction.
