

Training on Environmental Aspects of Sustainability for Faculty & Staff

Training on Environmental Aspects of Sustainability for Faculty & Staff

IIHMR University, Jaipur, places strong emphasis on environmental sustainability and integrates it into institutional planning, campus activities, and community engagement. The University ensures that **students, faculty members, and non-teaching staff** are regularly sensitized and trained in environmental aspects through **structured, mandatory institutional programmes** conducted every academic year.

During the assessment period, the University organized a series of **environment-focused training and awareness initiatives**, including **Swachhta-Utsav, sustainability awareness and cleanliness drives, tree plantation programmes, water conservation awareness activities**, and the **observance of World Environment Day**. These programmes were designed to create awareness on issues such as **clean and green campus practices, waste management, conservation of natural resources, biodiversity protection, and sustainable lifestyles** .

Environmental sustainability programmes at IIHMR University are conducted in diverse formats such as **workshops, campaigns, extension activities, and hands-on field-based initiatives**, enabling experiential learning and active participation. Participation in these activities is encouraged across academic and administrative units, ensuring that environmental responsibility becomes a shared institutional practice rather than an individual effort.

Faculty members, administrative staff, and students engage collectively in these initiatives, reinforcing a culture of sustainability, social responsibility, and ecological sensitivity. The University maintains documentation of these activities through reports, photographs, attendance records, and website uploads, contributing to transparency and continuous improvement.

Through consistent implementation of mandatory environmental training and sensitization programmes, IIHMR University, Jaipur, fosters a sustainable campus ecosystem and prepares its academic community to respond responsibly to environmental challenges at local, national, and global levels.
