BUILDING LEADERSHIP FOR A CLIMATE-RESILIENT FUTURE

Climate change is no longer merely an environmental concern; it is a strategic challenge affecting businesses, communities, institutions and governments. Leaders today must understand climate risks, manage natural resources sustainably, engage stakeholders effectively and build resilient organizations capable of adapting to uncertainty. This Management Development Programme equips executives, development professionals and academicians with practical frameworks and tools to navigate climate challenges while creating sustainable and inclusive development pathways.

ABOUT IIHMR UNIVERSITY

IIHMR University, Jaipur, is a leading postgraduate research university dedicated to improving management systems and practices in healthcare, development management, public policy and sustainability. The University combines academic excellence with practical engagement and has established strong collaborations with national and international institutions.

PROGRAMME OBJECTIVES

The programme aims to strengthen leadership capacities of corporate executives, NGO leaders and academicians in:

- Understanding climate risks and vulnerabilities
- Managing commons and common property resources
- Developing climate-responsive organisational strategies
- Building institutional and community resilience
- Promoting sustainable and inclusive development
- Enhancing stakeholder collaboration and partnerships
- Integrating ESG and sustainability principles into governance.

SPECIAL THEMATIC AREAS

- Climate Risk and Adaptation
- Management of Commons and Common Property Resources
- ESG and Sustainability Governance
- Community Resilience and Social Inclusion
- Water, Forest and Biodiversity Governance
- Circular Economy and Green Innovation
