AI-Driven Decision-Making for Hospital Leaders

 **November 19-21, 2026**

Background

The healthcare sector is witnessing an unprecedented transformation driven by data, digital technologies, and Artificial Intelligence (AI). Hospital managers are increasingly expected to make timely, evidence-based decisions that enhance operational efficiency, patient outcomes, financial sustainability, and regulatory compliance.

This Management Development Programme is designed to equip hospital managers and healthcare leaders with practical skills in Excel, Power BI, AI-enabled tools, and advanced analytics to support data-driven decision-making. Through hands-on demonstrations, case studies, and real-world applications, participants will learn how to convert hospital data into actionable insights for strategic and operational excellence.

Objectives

By the end of the programme, participants will be able to:

-  Understand the role of AI in modern hospital management
-  Analyse healthcare data using advanced Excel techniques
-  Build interactive dashboards and reports using Power BI
-  Use AI-enabled tools to improve decision-making and productivity
-  Monitor key hospital performance indicators effectively
-  Strengthen operational planning and resource optimisation
-  Develop data-driven strategies for quality improvement and patient care

Pedagogy

The programme offers a multifaceted learning experience through lectures, group discussions, case studies, and hands-on experiential learning. Participants are immersed in a dynamic learning environment designed to foster theoretical understanding, actionable real-world insights, and service-ready skills.
