CORPORATE BRIEFS

IIHMR University, Jaipur is organizing a 5-day Training Program on "Public Health Management for District and Block Level Officials, Odisha" from February 2-6, 2024. Twenty-eight District and Block Public Health Communication Officers from Government of Odisha are set to benefit from a robust learning ecosystem that seamlessly blends theoretical foundations with practical applications. Today on the inaugural ceremony of the programme, Dr. P. R. Sodani, President of IIHMR University, expressed enthusiasm about the collaboration, stating, "This training program is a unique opportunity for district and block-level officials to enhance their public health managerial competencies. The diverse range of topics covered will empower participants to address public health challenges strategically, contributing positively to the health and well-being of communities." This robust training program will provide a platform for participants to exchange experiences, engage in discussions, and build a comprehensive understanding of public health management principles. By the end of the program, participants will emerge with the confidence and competence needed to navigate the complexities of public health challenges successfully.
