The participants are from Afghanistan, Bangladesh, Bhutan, India, Myanmar, Nepal, and Somalia.

"Vaccine economics has been an essential and critical aspect of public health in India. The global COVID-19 situation affected routine vaccination programmes. It accentuated the need for a robust model for the under-trial COVID vaccines, especially in the low- and middle-income countries, so that the maximum number of people who need it can get it," said David Bishai, Professor, Johns Hopkins Bloomberg School of Public Health, USA and Program Lead
