The agreement between IIHMR University and ICMR—National Institute for Implementation Research—highlights a shared commitment to establish a synergistic relationship focused on joint research initiatives, the development of enhanced educational programs, and the creation of scientific applications.

IIHMR University has officially entered into a Memorandum of Understanding (MoU) with the ICMR - National Institute for Implementation Research on Non-Communicable Diseases (ICMR-NIIRNCD) in Jodhpur. This partnership aims to foster collaboration in research, education, and the exchange of scientific knowledge, enhancing both institutions' capabilities in tackling public health challenges.

Objectives of the Partnership

The agreement highlights a shared commitment to establish a synergistic relationship focused on joint research initiatives, the development of enhanced educational programs, and the creation of scientific applications. By leveraging their respective expertise, IIHMR University and ICMR-NIIRNCD seek to make significant strides in the field of non-communicable diseases (NCDs).

Dr. P.R. Sodani, President of IIHMR University, emphasized the importance of this collaboration, stating, "We will explore opportunities in joint research and technology projects, as well as joint postgraduate degree and certificate programs. Our combined efforts will empower the next generation of healthcare professionals through a collaborative approach to education and knowledge exchange."

Student Exchange Programs and Professional Development

A key component of the MoU is the establishment of student exchange programs that will allow postgraduate students and doctoral research scholars from both institutions to gain invaluable practical experience. This initiative aims to enrich their academic journeys while providing them with exposure to real-world challenges in the healthcare sector.

Dr. Bontha V. Babu, Director In-charge of ICMR-NIIRNCD, expressed enthusiasm about the potential impact of the student exchange programs, highlighting the benefits of shared learning experiences.

Knowledge Dissemination Through Events

The collaboration also promises to create a collective platform for organizing webinars, seminars, and conferences focused on disseminating scientific knowledge. These events will bring together experts and academics to discuss the latest research, trends, and challenges in addressing NCDs, thereby contributing to the broader healthcare ecosystem in India.

Commitment to Advancements in Healthcare

The MoU was signed in a formal ceremony attended by both Dr. Sodani and Dr. Babu, marking a significant step forward in advancing research and education in non-communicable diseases. This partnership not only strengthens the capabilities of both institutions but also aims to contribute positively to public health in India through innovative research and education initiatives.

With this collaboration, IIHMR University and ICMR-NIIRNCD are poised to make meaningful contributions to the field of healthcare, equipping the next generation of professionals with the skills and knowledge necessary to combat the challenges posed by non-communicable diseases.
