**IIHMR Startups to Host HealthXchange 2026, Bringing India's Healthcare Ecosystem on One Platform**

By India Education Diary Team March 29, 2026

Jaipur : IIHMR Startups, a unit of IIHMR Foundation, is set to host HealthXchange – Care Innovation Summit on March 27, 2026, at IIHMR University, Jaipur, bringing together hospitals, HealthTech startups, investors, government representatives, and institutional stakeholders for focused collaboration and innovation.

HealthXchange is a curated healthcare business summit designed to address one of the most critical challenges in healthcare innovation—the gap between promising solutions and real-world hospital deployment. By enabling direct engagement between decision-makers and solution providers, the platform aims to turn conversations into actionable partnerships.

A key highlight of the summit will be the participation of 30 carefully selected startups, who will engage in structured speed-dating sessions with 50+ hospitals, corporates, government stakeholders, and healthcare leaders, creating opportunities for business collaborations, pilot projects, and real-world deployments. This format is designed to accelerate decision-making and enable meaningful, outcome-driven partnerships.

The summit will feature a keynote address, panel discussions on AI-enabled healthcare, digital transformation, and CSR-led innovation, along with a startup showcase and curated networking sessions that facilitate direct interactions between startups, hospitals, and investors.

Dr. P. R. Sodani, President – IIHMR University and Director – IIHMR Foundation, shared his vision for the event: "HealthXchange is a platform where innovation meets real-world implementation, fostering meaningful collaborations across the healthcare ecosystem."
