2. EVENT DETAILS

IIHMR University conducted a **Guest Faculty Lecture** under the theme **Let's Talk About HEALTH** on **August 18, 2026**, focusing on **Cancer Control in the Community: Prevention, Early Detection, and Diagnosis**. The session was designed to enhance understanding of the growing burden of cancer and the critical importance of community-level interventions in advancing cancer control and improving public health outcomes.

The session featured **Dr. Naresh Somani, Director, Oncology & Head, Medical Oncology, HCG Cancer Centre & Somani Hospital, Jaipur**, as the guest faculty. Drawing on his extensive clinical and public health experience, Dr. Somani provided valuable insights into the epidemiology of cancer, risk factors, and the increasing disease burden in India and Rajasthan.

Key topics covered in the lecture included:

- The growing burden of cancer and its impact on individuals, families, and health systems.
- The significance of prevention strategies, including lifestyle modifications, risk reduction, and health promotion.
- The importance of early detection and timely diagnosis in improving treatment outcomes and survival rates.
- The role of appropriate treatment protocols and multidisciplinary care in cancer management.
- The vital role of community-level interventions, health education, and screening programmes in advancing cancer control.

The session highlighted how public health approaches, community engagement, and health system strengthening are essential to reducing cancer-related morbidity and mortality. Dr. Somani emphasised the need for coordinated efforts among healthcare providers, policymakers, communities, and educational institutions to promote cancer awareness and early intervention.

Participants gained a deeper understanding of cancer control strategies and the importance of integrating prevention, early detection, and diagnosis into public health practice. The lecture reinforced IIHMR University's commitment to addressing critical health challenges and promoting evidence-based approaches to disease prevention and health promotion.
